PROJECTS -

Pet Store and Accessories Management System
Technologies: HTML, CSS, JavaScript, Python, Django, MySQL
This project is like a special computer program that helps people who own pet stores to manage everything in their store more easily. With this system, they can keep track of all the things they sell, like pet food, toys, and other items. It also helps them remember important information about their customers, like what they bought before and when they might need something again.

Online Supplement Shop Management System (E-commerce)
Technologies: HTML, CSS, JavaScript, Python, Django, MySQL
Developed a full-featured online supplement shop management system using Django, incorporating robust functionalities for seamless user experience. o Implemented secure login and logout features, along with email authentication to ensure user account safety and data integrity. o Integrated Razorpay for smooth and secure payment processing, enhancing the overall checkout experience for users. o Streamlined various aspects of e-commerce operations, improving efficiency in order processing and customer management..

EXPERIANCE –

Web Developer Intern
Sanity Technology | 3-Month Internship.

- Developed and deployed multiple web projects for clients, including PeakProSys Solutions Pvt. Ltd.
- Collaborated with senior developers to design user-friendly interfaces using HTML, CSS, and JavaScript.
- Implemented backend features with Python and Django, and optimized website performance for faster load times.
- Gained hands-on experience in deploying applications to production environments.
